

KENNETH KINUNGI MAUWI

Thika, Kenya | +254 717 221 312 | kinungikenneth@gmail.com | github.com/M4uwi

PROFESSIONAL SUMMARY

Electronic and Computer Engineering student at JKUAT with hands-on internship experience in electrical systems installation, maintenance, and troubleshooting. Adept at applying engineering principles to real-world industrial environments, with a strong foundation in circuit analysis, database systems, and embedded technology. Eager to contribute technical skills and a problem-solving mindset to challenging engineering roles.

EDUCATION

B.Sc. Electronic and Computer Engineering 2022 – Present

Jomo Kenyatta University of Agriculture and Technology (JKUAT) | Juja, Kiambu

Relevant Coursework: Circuit Theory, Digital Systems, Microprocessors & Embedded Systems, Power Electronics, Database Systems, Computer Networks

Kenya Certificate of Secondary Education (KCSE) Graduated May 2022

The Alliance High School | Kiambu, Kenya

WORK EXPERIENCE

Electrical Engineering Intern May 2025 – Jul 2025

Devki Group of Companies *Ruiru, Kenya*

- Collaborated with the electrical team to install and maintain industrial electrical systems, ensuring compliance with safety standards.
- Diagnosed and replaced defective components including circuit breakers, fuses, switches, outlets, and lighting fixtures.
- Performed routine preventive maintenance on electrical systems and equipment to minimize downtime.
- Interpreted engineering blueprints and technical schematics for accurate project execution.
- Coordinated cross-functional workflow tasks, improving team efficiency and on-time project delivery.

Electrical Engineering Intern May 2024 – Jul 2024

Kenya Electricity Generating Company (KenGen) *Naivasha, Kenya*

- Carried out routine and corrective maintenance on industrial machinery to maintain optimal functionality.
- Diagnosed electrical faults using industry-standard testing instruments, reducing equipment downtime.
- Troubleshoot and repaired electrical systems in heavy industrial machinery, improving operational performance.
- Installed and updated electrical appliances, fixtures, and distribution systems.
- Replaced defective components including switches, fuses, relays, contactors, and timers.
- Operated hand and power tools for precise installation and repair tasks.

TECHNICAL SKILLS

Electrical & Systems: Electrical installation & maintenance, fault diagnosis & troubleshooting, preventive maintenance, safety compliance

Tools & Equipment: Multimeters, oscilloscopes, hand & power tools, blueprint/schematic interpretation

Computing & Software: SQL, database design principles, Git/GitHub, basic programming concepts

Soft Skills: Team collaboration, technical communication, public speaking (Toastmasters International)

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

Introduction to SQL *SimpliLearn*

Toastmasters International *Communication & Leadership Development*
